Powerline Control Systems Selects Bedrock Learning to Provide Online Training for Custom Installers

Bedrock Learning to develop and host PCS training and testing

[Powerline Control Systems, Inc.](http://www.PowerlineControlSystems.com) has selected [Bedrock Learning](http://www.BedrockLearning.com) as its exclusive online training partner for PulseWorx products and applications. PCS is the manufacturer of PulseWorx lighting control for residential and light commercial applications, and inventor of Universal Powerline Bus® (UPB) technology; Bedrock Learning is the preferred connected home industry online training provider.

Bedrock Learning is developing and hosting three online training courses and testing for PulseWorx Systems. These interactive courses will equip integrators with the knowledge needed to successfully install and configure PulseWorx Systems. The online testing will require a passing score of 80% or better to qualify to become a PulseWorx Certified Integrator and receive a Certificate of Completion. These online courses include:

1. PulseWorx Overview
2. Basic Design and Install of a PulseWorx System
3. Configuring a PulseWorx System with UPStart

“Powerline Control Systems has always made it a high priority to provide custom integrators with a superior level of training,” said Scott Klodowski, Director of Sales and Marketing, PCS. “We’ve chosen Bedrock Learning to enhance the PCS training curriculum for online delivery and create the online test required for our PCS Certified Integrators. Bedrock is the leader who understands the industry and is recognized for outstanding online delivery of technical material in easy-to-understand and retain methods. This partnership not only makes learning PulseWorx affordable and readily available, it provides us with resources for student management, the opportunity to reach out to more audiences, and offers PCS dealers savings on the many objective Bedrock Learning online courses.”

All of these online training and testing resources are accessible 24/7. This open access format will allow PCS to reach more integrators effectively and efficiently, while verifying knowledge with the PulseWorx Certified Integrator testing standards.

“It is an honor to be selected and trusted by PCS to advance their curriculum to online delivery. For years their commitment to training has produced competent installers and satisfied customers. By expanding PulseWorx training to online, many dealers eager to offer PCS products can now be trained and live instruction can focus in more detail on advanced product features,” said Helen Heneveld, president of Bedrock Learning.

Bedrock Learning offers its own line of vendor-neutral online training for the connected home industry, while also providing customized training development for manufacturers and others. They offer an exclusive training tool unlike any other in the industry by providing objective instruction on the principles of the different technologies in the home, including networking, multi-room audio, home theater and lighting control. Bedrock Learning brings together subject matter experts, educational resources, and the latest online learning technologies to ensure the highest quality of instruction.

About Powerline Control Systems, Inc.

Powerline Control Systems has been developing, manufacturing top-of-the-line lighting, and electrical control devices for the residential and commercial markets since 1992. PCS provides a complete range of products under the PulseWorx® brand, including light switches, light dimmers, keypads, touchscreens, configuration software, and a variety of other electrical control devices; powered by the UPB® (Universal Powerline Bus) patented technology, the innovation of the PCS design team. UPB is answering the call for a lower cost, high reliability lighting control system to provide an alternative to expensive proprietary and hardwired systems. For more information on PCS, visit www.pcslighting.com.

About Bedrock Learning

Bedrock Learning solves your training needs with online curriculum for the connected home industry. Developed by industry experts, courses deliver the principles of technology systems in the home: Structured Wiring, Multi-Room Audio, Home Theater, Lighting Control and Home Networking. Online courses are convenient and available 24/7, allowing students to work at their own pace. Installers, salespeople, customer support and other professionals learn while quizzes/final tests provide knowledge verification. For over 20 years, companies have come to rely on Bedrock Learning because of student success and their ability to help drive business performance. Visit www.bedrocklearning.com or call 616.355.1418 to explore the possibilities.
